Yes Daniel Sahat Parulian Sinaga

yesdaniel60@gmail.com | +62 812 9084 5634 | Bogor, Jawa Barat, Indonesia

Professional Summary

Informatics graduate from Universitas Gunadarma with a GPA of 3.93/4.00 and hands-on experience in front-end development and UI/UX design. Skilled in building responsive web interfaces using React.js, HTML, CSS, and JavaScript, translating design concepts into functional user interfaces, and integrating front-end components with APIs. Proficient in Figma for wireframing and interactive prototyping, with additional project experience in AI-powered web applications using Streamlit. Seeking to contribute to front-end development and user-focused web application projects.

Education

Universitas Gunadarma 2022 to 2026
Bachelor's Degree in Informatics | GPA: 3.93/4.00

Technical Skills

Programming Languages: HTML5, CSS3, JavaScript, Python
Front-End Development: React.js, Responsive Web Design, API Integration, Cross-Browser Testing, Debugging
UI/UX Design: Figma, Wireframing, Interactive Prototyping, User Research
AI and Web Applications: Streamlit, Transfer Learning, EfficientNetB0
Database and Networking: Advanced Database Systems, Cisco Packet Tracer, Networking Fundamentals
Operating Systems: Linux CLI, Basic Service Management, Basic Firewall and Security
Core Competencies: Problem Solving, Team Collaboration, Time Management, Attention to Detail

Experience

Front End Developer | E-Library SMPN 147 Jakarta | Live Website October 2025 to January 2026

- Developed front-end interfaces for an e-library website using React.js, HTML, CSS, and JavaScript based on provided UI/UX designs
- Implemented a book search feature and catalog pages displaying newest and most-read books to help users find digital books quickly
- Implemented responsive layouts to support usability across different screen sizes and devices
- Integrated front-end components with back-end APIs and tested functionality across multiple browsers
- Identified and resolved interface bugs while coordinating with design and back-end teams to align implementation with project requirements

Data Processing Support | Desty Commerce June to August 2025

- Processed approximately 1,000 daily data entries related to partner company invoices and partial payment records
- Maintained daily processing reports and communicated progress updates to the team leader
- Supported accurate data recording and administrative tracking of transaction information

Content Division Staff | Smarter Education May to December 2024

- Created weekly social media content and promotional materials for organizational events and educational programs
- Coordinated with other divisions to align content production with program schedules and communication objectives
- Prepared monthly activity reports and created programs such as Moretovision, Smartsolut, and iSmart
- Received Staff of the Month recognition based on monthly performance evaluation

Projects

Mango Leaf Disease Detection App | Thesis Project

- Developed an AI-powered application to classify eight mango leaf conditions using transfer learning with the EfficientNetB0 architecture
- Built an interactive web application using Streamlit, enabling users to upload images or capture photos through a live camera interface
- Integrated the trained model into the application to provide an accessible interface for image-based classification

Manga App Remake | UI/UX Design Project | Figma Prototype

- Designed a multi-screen manga reading application in Figma, covering onboarding, authentication, home, search, favorites, settings, and download features
- Developed an interactive prototype with touch and drag interactions to demonstrate user navigation and key application workflows
- Designed reader customization features, including horizontal and vertical reading modes, reading direction, and resolution settings

Training and Professional Development

- **P2MW Series 6 UI/UX Design Workshop** | September 2024: UI/UX design process, idea development, prototyping, design principles, user research, and UI/UX analysis of the Shopee e-commerce platform
- **LePKom Technical Training** | October 2022 to August 2025: networking and server OS fundamentals, Cisco router and switch configuration, routing, VLAN, Linux command-line operations, service management, and basic firewall and security
- **Building Website Using HTML5** | 2026: practiced building a basic website using HTML and CSS
- **Advanced Database Systems** | BNSP | 2026
